PREAMBLE:

Owing to the drought in Haliyal and Joida talukas for successive two years, about 200 tanks in the this region were totally dried up adding to the woes of the farmers. This year thanks to his ardent interest in mitigating the worries of the farmers R.V.Deshpande, Chairman of Shri V R.Deshpande Memorial Trust struck upon a brilliant idea of de-silting and rejuvenating the tanks. The Trust took the initiative and farming community responded positively.

The Corporate bodies also joined hands to contribute their mite (under their Corporate Social Responsibility scheme) to the task of de-silting the tanks in Haliyal and Joida talukas.

Strengthening of bunds is also a part of this massive programme. This has saved a great amount of the burden on the State exchequer. The fertile soil in the form of silt was enthusiastically lifted by the farmers surrounding the tanks to fertilize their farm land. The farmers of about 150 villages are going to benefit from the de-silting programme.

PROJECT DETAILS:

DETAILS OF DESILTING & REJUVENATION OF TANKS INITIATED BY TRUST

SL.NO	ZILLA PANCHAYAT	NO. OF TANKS	TOTAL CUM
1	Tergaon ZP Area	21	359080

THE WAY FORWARD

The task initiated by the Trust has received support from rural area and farmers. The entire farming community has come forward and participated in the tank rejuvenation programme. Moreover, the good rains have helped these tanks to conserve water.

Encouraged by results, The Trust has made the activity on-going, which has long way ahead. The Trust has ambitious plan to rejuvenate all the tanks in Haliyal and Joida area in the coming days. At the same time the education of organic farming, water conservation and rain water harvesting activities will continue in a structured way. In this endeavor we seek the continued support of our partners and stake holders in the coming years.

Project coordinated by Canara Bank Deshpande RSETI.
